## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to an impression assembly, classified in class 53, subclass 129.1.
  - II. Claims 8-12, drawn to a method for impressing a member on a top surface of a can having a lid, classified in class 53, subclass 410.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case (1) the process as claimed in claim 8 can be practiced by another materially different apparatus such as one having one having a circumferential tooth with a circumferential diameter that is slightly less than the circumferential diameter of the can lid; and (2) the apparatus as claimed in claim 1 can be used to practice another and materially different process such as covering the entire rim of the can.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
